PROFESSIONAL SUMMARY

Product Manager and early-stage product builder with experience across fintech, edtech, and cultural technology. Skilled in product discovery, user research, roadmap planning, product requirements, feature prioritization, and cross-functional execution. Co-founder of Afroart Studios, where I lead product strategy for a 3D cultural asset platform focused on digitizing and monetizing African artifacts. Passionate about turning ambiguous problems into structured product opportunities, aligning business goals with user needs, and supporting measurable product growth.

SELECTED PRODUCT IMPACT

- Contributed to product initiatives that supported the acquisition of 5,000+ new users in the Nigerian fintech market.
- Improved an edtech learning program that trained 2,000+ learners, achieving a 90% completion rate and approximately 40% referral-driven growth.
- Secured a \$20,000 grant and led early product discovery for Afroart Studios, a cultural technology platform focused on 3D digitization and monetization of African artifacts.
- Conducted market and competitive research across fintech, education, and 3D digital asset markets to inform product strategy, feature prioritization, and monetization opportunities.

CORE COMPETENCIES AND SKILLS

Product Strategy: Product discovery, problem definition, roadmap planning, feature prioritization

Product Execution: Product requirements documents, cross-functional collaboration, agile product development

Research and Insights: User interviews, market research, competitor analysis

Tools: Figma, Notion, Trello, Google Workspace, Jira, LLMs

WORK EXPERIENCE

Co-Founder

Afroart Studios

03/2024 – present
Nigeria

- Co-founded and led product strategy for a cultural technology platform digitizing and monetizing African artifacts as high-fidelity 3D assets for global creators, game developers, educators, and cultural institutions.
- Secured a \$20,000 grant to support early product development, 3D scanning efforts, platform exploration, and market validation.
- Conducted product discovery through stakeholder interviews with artists, cultural institutions, creators, and game developers to understand user needs, marketplace opportunities, and adoption barriers.
- Defined the initial product vision, product requirements, roadmap, and distribution strategy, resulting in a successful listing on Fab, the Epic Games marketplace, reaching millions of Unreal Engine users worldwide.
- Drove market and competitive research in the 3D asset space to identify opportunities for authentic African cultural representation, creator distribution, and marketplace monetization.

Product Associate

GritinAI

07/2023 – 05/2024
Benin City, Nigeria

- Conducted market and competitor analysis to support product improvements, program positioning, and learner acquisition strategy.
- Collaborated with operations, marketing, instructors, and technical teams to align product delivery with business goals and learner expectations.
- Designed and improved feedback loops between learners and internal teams, helping identify friction points, improve learner experience, and strengthen program delivery.

- Supported the scaling of a data analytics learning program that trained 2,000+ learners, contributing to a 90% completion rate and approximately 40% referral-driven growth.

Associate Product Manager (Contract)

Paxful | Remote

04/2021 – 08/2022

USA

- Supported product and growth initiatives in a global fintech peer-to-peer marketplace, contributing to the acquisition of 5,000+ new users in the Nigerian market.
- Conducted in-depth competitive analysis of fintech alternatives and presented insights that informed product features and revenue strategies.
- Collaborated closely with engineering, compliance, and business teams to execute product and growth initiatives in a highly regulated environment.

VOLUNTEERING

Edo Innovate

Mentor, Project Management

Mentored participants in a technology skills initiative supported by the Edo State Government and Pluralsight.

2020 – 2021

Benin City, Nigeria

Curators University

Technical Fellow, Programs

- Coordinated data science and machine learning bootcamps for 1,000+ participants.
- Improved program delivery through participant feedback and operational support.
- Supported program planning, participant engagement, and communication across training sessions.

10/2018 – 02/2019

Benin City, Nigeria

PROJECTS

BossomHeart

- Explored a digital health product concept designed to support women living with breast cancer.
- Conducted user research to understand patient challenges, care support needs, emotional pain points, and access gaps.
- Translated research insights into core product features, early user flows, and patient support concepts.
- Applied product discovery methods to define the problem space, target users, and potential solution direction.
